

Golden Codex **vc** = Voice Command, **hc** = Hand Command, **ex** = Explanation.

The character I roleplay and wrote this for, can be found under: <http://www.rprepository.com/c/dagger/>

The language I used for the verbal commands is Esperanto, a constructed international auxiliary language. Inspirations of gorean novels, BDSM sites and suggestions from various friends have been used and altered.

Don't put the commands/positions onto your site without my permission. Do not alter them in any way. A lot of thoughts, work and creativity went into them, and simply taking them is theft and rather rude.

VC - Lango **HC** - *Tongue is touched with index and middle finger at the same time.*

EX - Slaves are often rewarded with pastries if they are pleasing. If given one, a dominant may command the slave to eat it very slowly, making it last a long time. This means they must eat the pastry incredibly slowly, barely touching it. Primarily the slave has to use his or her tongue on it, only nibbling it once in a while. This serves to put the slave under good discipline, is a good exercise for the tongue, and increases the slaves sexual heat. The dominant could also ask a slave to eat other food in the same manner besides pastry. Drinking milk, dipping fingers into the bowl, and licking them clean slowly.

VC - Ribelo **HC** - *Place fists together, with knuckles touching.*

EX - A command, where a mock rebellion is permitted. When a slave has been allowed defiance, it is very sweet to bring them back under absolute control. This also offers an emotional and physical outlet for obedient slaves without conflicting with their submissive nature. It is advised to use the command behind closed doors, only. Defeat or "Cesi" ends the rebellion.

VC - Cesi **HC** - *Place one hand flat, above the other hand.*

EX - No matter what the slave is doing, or had been commanded to do, the command will make them stop immediately. The slave has to stay in the position they were in, when the command has been uttered. A nod following the command, indicates that they are allowed to drop/get onto their feet and kneel. Of course, with their gaze averted, unless commanded otherwise.

VC - Vinbero **HC** - *Put all fingertips together, facing upwards.*

EX - Feeding a Dominant is something which is rather nice to see and experience especially with a well trained slave, its delicacy so beautiful. The slave feeds the Dominant a grape held between teeth. The slave may or may not have wrists braceleted behind the back for this particular feat. One leg is folded beneath and the other is extended behind, toes pointed. The slave then lifts the grape delicately to the Dominants mouth. This is a way for a slave to express the need for physical contact, in offering to serve grapes. When the Dominant orders to be fed grapes, it may indicate for the slave that physical contact is wanted, thus making the slave tremble with anticipation. A tease that may or may not result in physical contact.

VC - Preteco **HC** - *Place two fingers on left thigh, while sitting.*

EX - A command, making a slave masturbate so she or he is ready to be used or in means of orgasm control. That means, that the female slave should be dripping and the male slaves cock showing signs of pre-cum, yet permission to cum might or might not follow. The slave has to apply a blindfold onto him or herself and lay onto the masters lap (or anywhere indicated) with belly up. The blindfold ensures that the slave does not know if the Dominant is actually paying any attention at all. The Dominant could very well read a book, eat, drink or simply write. Whatever comes to mind, use and abuse your creativity.

VC - Krii **HC** - *Raking the nails along the blindfolded slaves thigh.*

EX - This command is to be used, after "Preteco!" if the Dominant wants to order the slave to cum. If they don't want, they can simply use "Cesi" to order the slave to stop and not move. A nod as mentioned above, lifts the spell and the slave kneels.

VC - Kvar **HC** - *Palm flat with a vertical hand, all four fingers straight and upright on the palm with the thumb tucked.*

EX - This is a command sometimes used for punishment. When ordered into this mode, the slave stays on all fours, like an animal, and cannot speak or reach for things with his or her hands. The slave is kept quite indefinitely as only a mute pet much like any dog would act. Sometimes they are even taught tricks they must learn without the help of verbal clues. In this form, which is commonly used for disciplinary purposes, or for the amusement of the Dominant, the slave is not permitted to arise from all fours; similarly they are not permitted human speech, though they may signify needs and desires by such means as cringing, and moaning and whimpering. Not permitted the use of their hands, save as a means of locomotion, they must also eat and drink from pans set on the floor, or, sometimes to satisfy their thirst, they must lap the water permitted to them from puddles or lick pillages from the tiles; too, it is not uncommon to chain them near their Dominants feet, while he or she dines, so that the Dominant may, if he or she wishes, throw the slave scraps of food. They will also be taught tricks, through which paces they may be put for the entertainment of the Dominants guests, such things as begging, lying down, rolling over, and fetching the Dominants sandals in their teeth. And, needless to say, when the Dominant wishes to use them sexually; it will be a position befitting the command. This "petplay" can be kept up for hours, days, or even weeks.

VC - Tegi **HC** - *Palm flat, with fingers spread.*

EX - No matter if the command is used, or a simple blanket, cloak or covering of any sort is thrown over the slaves head, they have to remain silent and motionless until freed from it by the person who used the command or the covering on them.

VC - Ligilo **HC** - *Hooking fingers together and closing hands into fists.*

EX - The slave is commanded to kneel with legs together, eyes downcast and as though bound, hands clasping opposite wrists in front of the body, until the slave is released. The slave is bound by invisible chains, by the Dominants will until freed.

VC - Franda **HC** - *Index finger placed on open palm.*

EX - When this command is given, the slave turns their head up to the Dominant, lips pursed in a sensual kissing position. The slave is to remain motionless; lips thusly puckered, and may not move until they are granted a kiss of the Dominant. Needless to say, the slave cannot speak with lips fully pursed. A command which could but doesn't have to follow is, "Adoro".

VC - Adoro **HC** - *Index and middle finger placed on open palm.*

EX - This command can follow "Franda" or be used on its own. The slaves task upon hearing that command, is dropping to their knees, crawling or crouching, depending on the position of the Dominant, and worship the Dominants body with his or her mouth. The slave should be able to use common sense and see what's appropriate given the location or guests present.

VC - Eksento **HC** - *Crossing index and middle finger.*

EX - Upon command, the slave must drop to the floor in a fluid motion, and turn onto their back, looking vulnerable. If the slave is wearing clothes, he or she has to shed them while writhing in a visually pleasing manner like a snake would shed it's skin. Moans and whimpers are allowed, and encouraged. Speech however, is not. Oil being poured over the wriggling slave by the Dominant would just make this command the more intriguing for both parties. Milk, booze or honey can be used, too.

VC - Beleco **HC** - *Index and middle finger of both hands, hooked and touching.*

EX - The slave has to brush the Dominants hair gentle and without tugging on it. The exact way of how somebody wants his or her hair to be combed can vary, but for the purpose of roleplay I will put down Daggars personal preference as an example.

- Prepare the hair for combing, by removing accessoires. (Hairpins are to be removed carefully by just touching the handle.)
- After preparing the hair, remove braids and tangles, then have your fingers testingly sift through the hair for confirmation.
- Three different sized combs are used to prepare the hair for brushing it. Start with the biggest, and finish with the smallest.
- A perfumed oil has to be applied onto the brush. You can choose for your Dominant, but ask him or her for confirmation.
- Separate the hair into several strands, depending on length and volume. Every single one has to be brushed with 30 strokes.
- Once all strands have been brushed, clean the tools thoroughly. When finished, put them away from where you took them.
